github.com/rickychenlin

Summary

I am passionate about coding and am seeking a challenging and fun environment. I want to develop my potential and build my experience in a mix of languages to create innovative software programs.

Technology

- HTML5, CSS3, JavaScript, ES6, jQuery
- Responsive web design, Bootstrap and Material UI framework
- React.js, MEAN Stack (Node.js, Express.js, Angular.js, Mongo DB)
- Java, PHP, C#
- MySQL
- GitHub, Git, Bitbucket, Sourcetree

Experience

Personal Portfolio - rickychenlin.github.io/ChenLin-Portfolio

- Responsive one-page portfolio, using knowledge of HTML5, CSS3, JavaScript and jQuery
- Figma for UI/UX mockup design and Wireframing
- Design portfolio page to be User-friendly and support for all kind of devices

Learning Management System

github.com/rickychenlin/learning-management-system---React
github.com/rickychenlin/learning-management-system-REST-API

- Learning Management System is designed for school admin system, using knowledge of HTML5, CSS3, React.JS
- UI/UX using Bootstrap framework
- Experience in React component and how to interact with parent and child component

- React-Dom-Router to keep UI in sync with URL
- Experience in create REST API using .Net core and C# and deploy in Service
- Contributing more backend experience on collaborate with API, epically in axios (get, post, put, delete)
- CRUD interactive with JSON data which store in REST API
- Experience in Agile team environment using tools - Bitbucket, cooperate with team member to achieve goal

Weather Web Application
rickychenlin.github.io/Weather-Web-Application---React
github.com/rickychenlin/Weather-Web-Application---React

- Weather Web Application is designed for easy to access Weather chancel and get local weather information
- Basic knowledge using in application is HTML5, CSS3, JavaScript and React.js
- Contributing backend experience using fetch data form Weather OpenWeatherMap API
- React component concept use to design layout of this application
- Experience in React component and Props, Lifecycle and event handling

Single-page Portfolio - github.com/rickychenlin/Single-Page-React

- Responsive single-page portfolio, using knowledge of HTML5, CSS3, JavaScript and React.js
- Star Bootstrap framework for UI/UX design
- Gain more experience about demonstrate React Router to keep UI in sync with URL

Education

JR Academy/ June 2018 --- Course in Full Stack Development
